

# AGRICULTURAL PRECAST

High strength, modular design solutions that won't  
dictate your needs - They accommodate them!

# BUNKER SILOS

The Boyd Bros 10ft high concrete bunker silo is one of the most cost-effective systems for bulk containment solutions.

High-strength 50MPa, wet-cast, air-entrained concrete coupled with heavy steel reinforcing ensures unsurpassed safety and durability against cracking and corrosion - No footings required.

Modular construction allows for a variety of configurations that can be changed as your needs change. Available in end-wall units, solid double walls for feeding off both sides or corner and tee configurations for dividing bins. They can also be engineered to support a tarp building.

Have us install or do it yourself!

# FENCELINE FEEDERS

Increase your overall efficiency with a fence line feed bunk system. At Boyd Bros, we use modular designs that conform to your site requirements, and are made from high strength 50MPa, air-entrained concrete with heavy steel reinforcing; ensuring unsurpassed safety and durability. Feed bunks can be placed in a field on existing soils, in a barn or even on a concrete pad- We can work within your guidelines to make you exactly what you need.

Slots for pallet fork allow for easy install with equipment you already own. Pre-slotted for head-rail attachment on 4' centres. Bolt-on or drop-in end caps also available.

**We live and work in a rural environment, and understand all of your farming needs.**

We have everything you require to build your new bunker silos, fence line feeders, water catchment, retaining walls and complete septic systems. All Boyd Bros Concrete agricultural products are manufactured with extremely high-strength 50MPa, which allows for unsurpassed corrosion protection in these highly corrosive applications. Don't ever settle for out dated, inefficient pour-in-place concrete techniques so many companies still use. Precast concrete sections provide a more modular, stronger, reliable, long-term solution to your storage and feeding requirements.

**Please visit our webpage for downloadable detail drawings.**
