

TIRED OF DIGGING UP YOUR SEPTIC LIDS?

Well, dig no more!

From concrete to plastic, big and small,
we have the solution for you...

Here at Boyd Bros, we understand that no one likes to do the back-breaking work of, first locating, and then digging up, your septic lids. We also understand that sometimes, lids just break!

In the interest of making life easier, Boyd Bros happily manufactures and supplies adapter lids to retrofit older model septic tanks; allowing for access openings to be at grade, while green caps remain camouflaged in the grass. Multiple options for sizing are available, so if it needs replacing, we can help!

Concrete Adapter Lids: Boyd Bros

⇒ 30" x 30" x 9" w/ Tuf-Tite 20" dia access (covers 28" x 28" opening)
