

The Waterloo Smart Panel

The Waterloo Smart Panel delivers 24/7 peace of mind to end users by directly linking their wastewater treatment system to their service provider.

Available upgrade for *all* Waterloo Biofilter advanced wastewater treatment systems

WATERLOO SMART PANEL

The Waterloo Smart Panel seamlessly controls, monitors, and data logs all aspects of your advanced wastewater treatment system. System settings can be changed remotely and data logging equips service providers with the information they need – saving many site visits and unnecessary costs.

24/7 System Monitoring and Remote Control via Stable Cellular Network

Live Remote Troubleshooting and Error Resolution

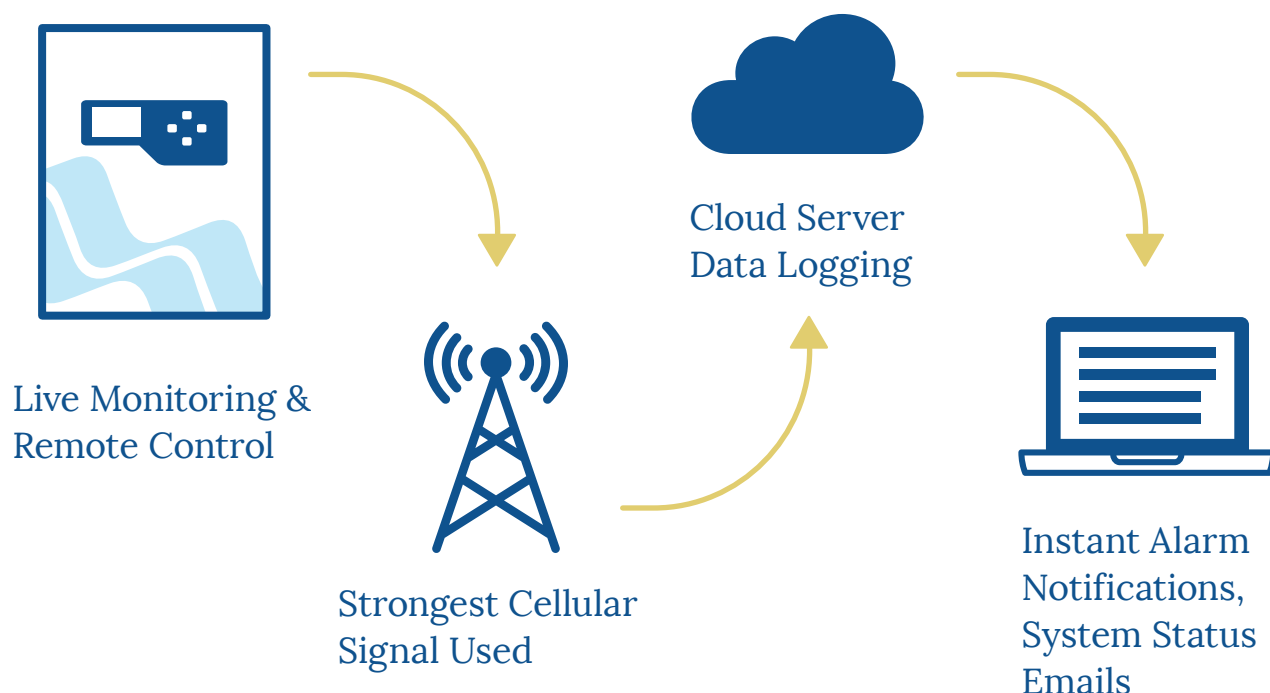

Instantaneous and Descriptive Alarm Notifications Sent Straight to Service Provider

Full Data Logging and Analysis of All System Parameters

Additional Features

- ▶ Secure, password-protected connection
- ▶ Pump current-draw monitoring alerts to problems before they occur
- ▶ Daily system status reports
- ▶ Program remotely, via touchpad, or USB connection
- ▶ Auto-generate charts using logged data
- ▶ In-office monitoring, programming, and live support
- ▶ Remotely change system settings
- ▶ Battery backup alarms during power failures
- ▶ Switch between demand and timed dosing modes

Supported Components

Controls: pumps, UV disinfection units, chemical dosing, and more

Utilizing: float switches, flow meters, digital transducers, dissolved oxygen sensors, and more
